DEPARTMENT OF INFORMATION TECHNOLOGY AND SUPPLY CHAIN MANAGEMENT

262-472-1945
gradbus@uww.edu

Overview

The Master of Science (MS) in Cybersecurity program offers studies in core areas of cybersecurity that include offensive and defensive security operations, security awareness training, security tools design and implementation, cybersecurity management, security policy and law, and emerging areas in security and privacy. The program offers both hands-on experiential learning and in-depth theoretical studies.

The MS in Cybersecurity is designed for both professionals and recent college graduates who aspire to advance their careers in cybersecurity. The degree program consists of 30 credits, including 15 credits of core courses and 15 credits of courses in an emphasis area: either cyber resilience or security engineering. The program will prepare students to obtain positions such as cybersecurity analyst, cybersecurity manager, cybersecurity engineer, or cybersecurity architect.
